Profile

I'm a front-end developer seeking opportunities to build modern, user-friendly web applications. Over the past year, I've enhanced my **TypeScript, JavaScript, React,** and **Redux skills**. As a team leader in an e-commerce project, I coordinated a team of 5, ensuring deadlines were met and tasks completed efficiently. I **implemented Redux Toolkit for state management**, developed a product filtering system, and designed a sleek, intuitive interface. I also oversaw all development stages and conducted thorough testing. My **English level is B1**, and I'm actively improving it. I'm reliable, goal-oriented, and dedicated to delivering high-quality results.

Skills

Typescript | JavaScript | React | Redux-toolkit | Router | HTML5 | CSS3 | SCSS | BEM | Material UI | Tailwind | Bulma | Fetch | REST API | Axios | Basic OOP understanding
Experience in leading team projects effectively

Git | Webpack | Gulp | Vite | Babel | Eslint | Prettier | ClickUp | Jira | Trello | SDLC | Waterfall | Agile concepts (Scrum, Kanban) | English: B1
